

CentOS 搭建大米 CMS

Xiaosi Artificial Intelligence 出品

官方网站: <https://gitee.com/dirdel2078904/technical-white-paper-sharing>

1. 配置本地 yum 源

1. 挂载本地/mnt 目录

```
# mount /dev/sr0 /mnt
```

/dev/sr0 代表光驱

```
# rm -rf /etc/yum.repo.d/*
```

```
# vi /etc/yum.repos.d/1.repo
```

[xiaosi]

Name=CentOS

Baseur1=file:///mnt

```
enabled=1
```

gpgcheck=0

```
# yum clean all
```

```
# yum makecache
```

刷新 yum 源并测试 yum 是否在本机运行

2. 安装 Apache 服务并配置

```
# yum -y install httpd
```

```
# systemctl start httpd
```

```
# systemctl stop firewalld
```

```
# yum install mod_php mysql php-gd -y
```

```
# cd /var/www/html
```

```
# yum -y install vim
```

```
# vim index.php
```

++++++index.php 内容++++++

<?php

```
Phpinfo();
```

```
?>
```

```
=====
```

安装 mariadb 服务

```
# yum -y install mariadb mariadb-server
```

```
# systemctl start mariadb
```

```
# mysql_secure_installation
```

Enter current password for root (enter for none): //输入数据库密码

Set root password ? [Y/N] y

New password :

Remove anonymous users ? [Y/N] y

```
=====
```

上传压缩包

```
# yum install lrzsz -y
```

```
# cd /var/www/html
```

```
# rz
```

用 rz 传输 dami.zip

```
# yum -y install unzip
```

```
# unzip dami.zip
```
